# The Sun Show

## Letter Tracing and Word Association

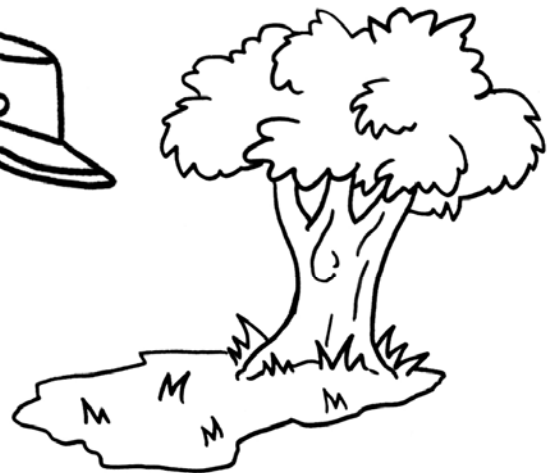

Kindergarten + Grade 1

Ask students to use crayons to trace over the letters and to color in the items, associating a word with an item by matching their colors. Explain the difference between “shade” and “tree.” Ask students to name other sources of shade (umbrella, side of building, shade structure, etc.) Discuss how each of these items relates to sun safety and can help to protect our skin from being harmed by overexposure to the sun.
